WHAT AL ROUSE THINKS OF IT

He Says the Coming Meeting Will Be the Best Ever Held in the Northwest Except Chicago.

Anybody that can't talk "hose" has no business in the vicinity of Grand Hapids for the next two weeks. Everybody talks it, from the sedate and serious minded superintendent of a Sun-day school, who blushes when filleys and geidings are mentioned, to the "dead game sport," who knows all the

dead game sport, "who knows all the jockeys and stable boys, and who expects to get some made tips. See?

The man who knows it all is here, and may be found wherever two or three are gathered together. He has learned the pedigree of three or four flyers, and talks gibby about "flat races," weighing in" and "maidens." He is a close student of the vernacular, and is supposed to be on terms of intihe is a close student of the vernacular, and is supposed to be on terms of intimacy with the fraternity. Along with him is the man with the "straight tip" that's a dead sure winner. The man who follows his advice may be seen eating sandwiches and drinking spring water at the lunch counters any time after tomorrow noon.

after tomorrow noon.
Several car loads of horses came yesterday, and the scene at the south grounds is animated and picturesque in the extreme. In the early morning the "jocks" take tueir favorites to the track to warm them up a little and keep them in condition. At times there are as many as fifty quadruped sprinters flying over the course. Occasionally a rider wishes to see what his horse can do on the track and lets the animal out for haif or three-quarters

Most of the horses came from Garheld park, Hawthorn park or St. Louis, and on account of the extremely wet and muddy condition of these tracks haven't had a chance to roll in the sand and kick up their heels in un-restrained freedom. The horses that have been here for four or five days already show the effects of the change. Everyone of them is gaining flesh and is in much better condition than when it came here. One of the visiting horse-men said yesterday that he should be glad he came here whether his norses came within sight of winning a race or not. He considered that the benefit his horses would receive from being two weeks at the Kent County grounds would more than repay him for his trouble even if they didn't win a thing. "That's going to be the greatest meeting ever held in the northwest outside of Chicago," he said. "Some of the best races held this year will be run out at that track or I'm going to be a very disappointed man. Every horseman and 'Jock' that I've seen speaks very enthusiastically of the track and we all know the horses that are going to run. No question about them." Mr. Rouse is the proprietor of them." NEW YORK IN DANGER-

The prohibitionists will meet this week at Cincinnati to put up a national ticket. Cincinnati beer and beer gar-dens have a reputation the length and breadth of the union, but this, of course, had nothing to do with determining the prohibs to hold their national convention in that city. If the fourth party people put up the right man they may be able to carry New York this year, for nave we not been told by Platt that Harrison cannot get told by Platt that Harrison cannot get the electoral vote of that state, and also by the biggest men in the demo-cratic party there that Cleveland is sure to lose it? If the "bosses" on both sides are right, New York will not be counted in the electoral college for either Harrison or Cleveland, under which circumstances the prohibitionists are welcome to it if they can get it. We should hate to see the Empire state carried by the conglomeration "people's' party on a free silver, sub-treas-ury platform. Beside that party the prohibitionist outfit is quite respectable. -Marquette Mining Journal.

One Pure Baking Powder. Like Telling a Secret.

A story is told and it is a true story that over seventy per cent of all the baking powders sold contain either alum or ammonia, and many of these powders contain both. The ill effects upon the system of food raised by alum or ammo-Bia powders are the more dangerous because of their insidious character. It would be less dangerous for the people were it fatal at once, for then such food would be avoided, but their baneful action because imperceptible at first and slow in its advances, is no less certain.

Dr. Price's Cream Baking Powder is declared by all authorities as free from alum, ammonia or any other adulterant. Its purity has never been questioned, and while it does finer and better work, it costs no more at retail than many of the adulterated powders.
